

**Fellow Rio Rancho Residents,**

**We can all be proud of the unified conservation efforts each of us takes every day in our mission to conserve and protect our greatest natural resource, our water supply.**

**Our efforts seek to ensure a future water supply for generations to come.**

**Each Rio Rancho citizen is a partner in the effort to use our water supply in a responsible manner. As the city undertakes efforts to conserve water through line replacement, we are also working to update and modernize wells and wastewater facilities as part of the ongoing conservation effort.**

**You can join us in the process of conservation and preservation by taking some simple steps in your home and business: check all of the water fixtures in your home to be sure they are not leaking or using excess water; replace outdated fixtures with water conserving fixtures and follow City Ordinances that are designed to promote conservation. Refer to city resource material for more information on how you can be a part of the solution.**

**With each of us working together, Rio Rancho will truly be “visionary” when it comes to water conservation.**

**Thank you,**

A handwritten signature in white ink, appearing to read "Gregory D. Hull". The signature is stylized and fluid.

**Mayor Gregory D. Hull**
